

EMPATHY MAP

User Perspective

Think and Feel

The user wants the data-import process to be simple, accurate, and easy to verify. The user expects employee information to be transferred without unnecessary manual work.

See

The user sees:

- Employee source data
- Import Set
- Imported records
- Transform Map
- Field mappings
- Transform results
- Final employee records

Say and Do

The user prepares employee data, uploads the file, configures the Transform Map, maps the fields, runs the transformation, and verifies the final records.

Pains

- Manual data entry
- Incorrect field mapping
- Duplicate records
- Missing values
- Data-format errors
- Difficulty checking imported records

Gains

- Faster data import
- Reduced manual work
- Accurate field mapping
- Easy verification
- Organized employee data
- Repeatable import process
